VEEDA EDGE

Simplifying the patient-based clinical trials processes for improved outcome

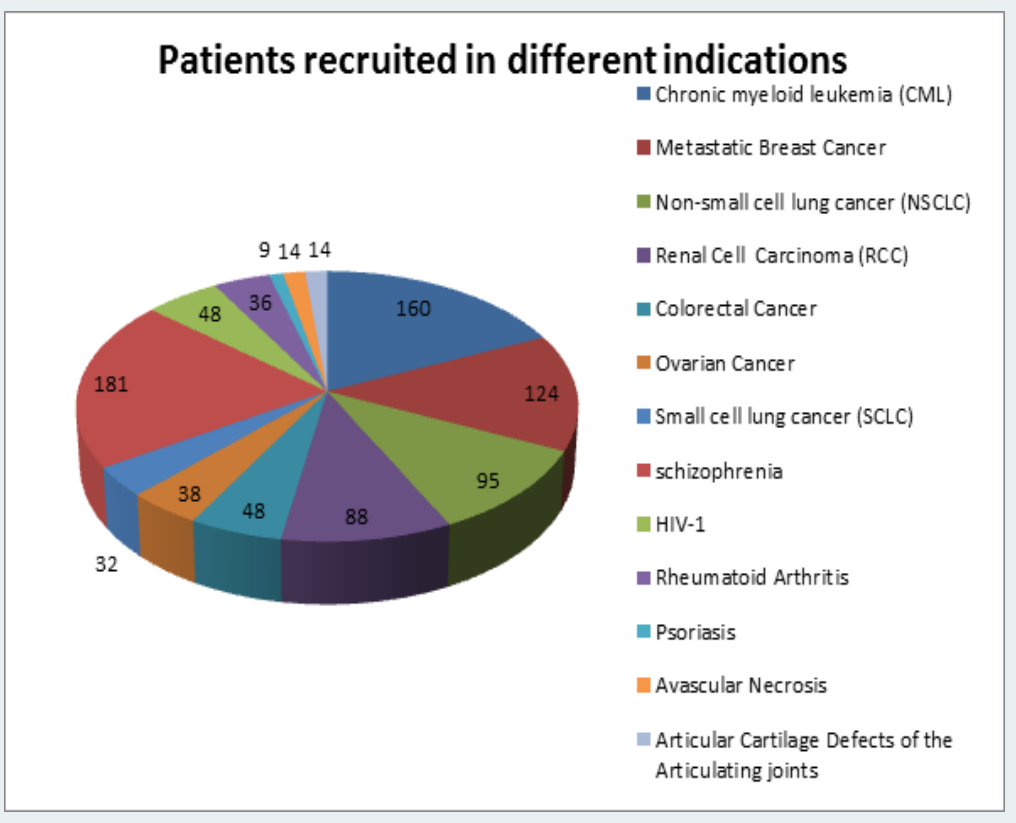
Veeda's Clinical Operations Department (COD) has a dedicated team of experienced professionals and an elaborate network of Clinical Trial sites across India to offer the services of patient based clinical studies with Pharmacokinetic and clinical end-point. We have so far completed 24 Patient based studies with 08 more studies ongoing in different stages of execution.

UNIQUE FEATURES OF VEEDA'S CLINICAL OPERATIONS TEAM :

- Knowledge-based, quality oriented staff with combined Team Experience in Clinical Trials of more than 130 clinical trials that includes around 25 global clinical trials, around 30 clinical endpoint studies and 75 patient based PK clinical trials.
- Database of more than 600 pre-screened experienced and GCP-trained Investigators / sites in various therapeutic areas.
- Study Design and Protocol Development Services.
- In-depth feasibility evaluation with potential Investigators' sites
- Project managers and CRAs experienced in planning, executing Clinical endpoint studies, Pharmacokinetic studies in patient population and Phase II / III studies.
- Key opinion leaders (KOLs) onboard - Consultants with vast experience in study design, conduct and safety aspects of Clinical Trials

REGULATORY TRACK RECORD :

With experienced team at COD, experienced Investigators and robust QA systems, we have **successfully faced total fifteen (15) USFDA inspections** at Investigator sites (at which Veeda had conducted PK studies) **with only one minor 483 observation, for which no action was required.**



VEEDA CLINICAL OPERATIONS CAPABILITIES :

The level of expertise and in-depth insight in clinical operations and project management helps us predict the risks and challenges in the study design and execution and mitigate them during study planning and set-up.

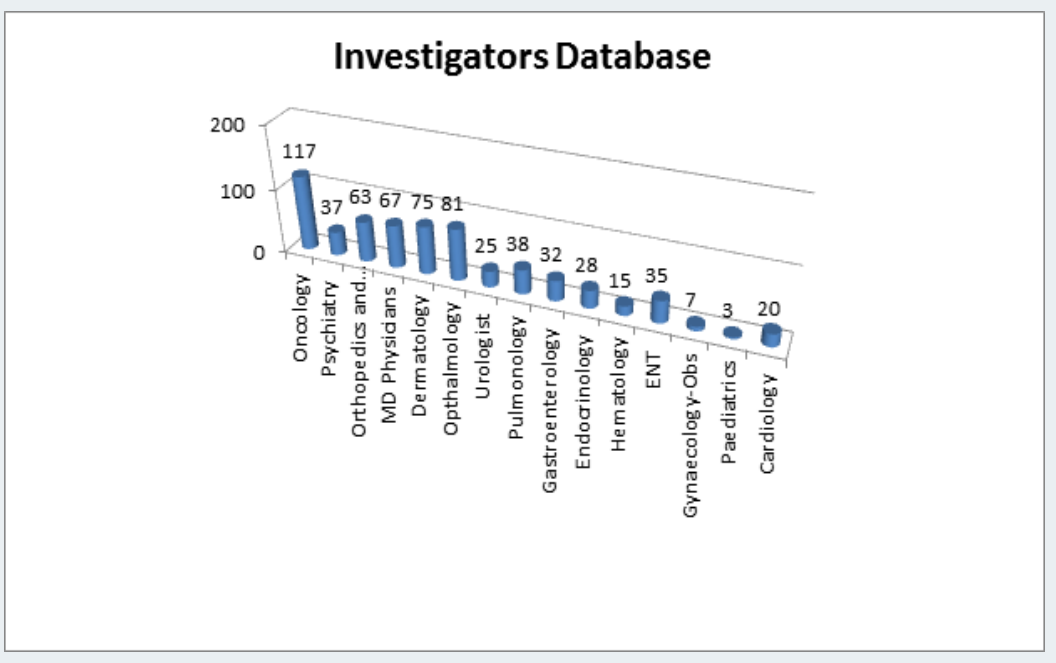
Some of the therapeutic segments where we can initiate studies at a shorter notice are

Therapeutic areas for Pharmacokinetic Studies

- Oncology
- Psychiatry
- Ophthalmology
- Rheumatology
- HIV/Immunology
- Dermatology
- Gastroenterology
- Orthopedics
- ENT
- Endocrinology

Database of Investigators across India :

Veeda's Investigators Database has access to more than 600 potential Investigators' site across India in below therapeutic areas.



Our Achievements :

- Clinical Operations unit of Veeda has overseen the enrolment of more than 900 patients from around 100 sites across India in different therapeutic areas such as Oncology, Psychiatry, HIV, Rheumatology, Dermatology and bone diseases.
  Successfully completed 13 USFDA inspections at Oncology sites.
- Good recruitment rate even for rare indications like SCLC, RCC
- Road Map for more than 45 molecules for Patient based Pharmacokinetic studies and 30 molecules for Clinical Efficacy end point studies
