

veeda edge

Simplifying the complexities of your oncology studies for better results

Veeda Clinical Research Pvt. Ltd. is **India's most experienced early phase clinical development CRO** with a global outreach providing ethical Clinical Research Solutions. With a competent team of **650 experienced** personnel and **a stern focus on providing quality solutions**, we are the ideal partner for **a quality conduct of your oncology studies**.

Challenges for Oncology based studies

- 1 **Identifying potential Investigators having prior trial experience** with good recruiting potential.
- 2 **Timely recruitment and compliance to protocol** with optimal resources.
- 3 **Sample collection and processing for complex formulations.**

At Veeda, we have already succeeded in setting forth simple yet quality procedures to tackle the complexities associated with oncology studies. With our experience of completing 14 PK studies for generic molecules and 4 phase II studies, we are better equipped to overcome oncology trial challenges.

Our Capabilities

- **Proven track record of timely recruitment completion** even for rare indications like RCC and SCLC.
- **Dynamic database of pre-screened experienced Investigators** with good recruitment potential.
- **Worked with more than 100 Investigators' sites** in different Therapeutic Areas.
- **Excellent regulatory liaison** to accelerate the approval process.
- **Scientific Project Management Team** sensitive to project needs.
- **100% Data review** by QA.

Veeda Advantage

Road Map for more than 42 molecules for Patient based Pharmacokinetic Studies

Proven regulatory track record with 20 USFDA (including 10 inspections at investigator sites), 5 European, 4 WHO & 5 ANVISA audits

Past experience of handling challenging BE studies like liposomal doxorubicin and protein bound paclitaxel

State of the art Bio-analytical Unit with more than 593 validated assays in its library of compounds, 36 NCE methods and 16 under development.
